13 – 16 November 2006 Cannes (FR)

French IPv6 Worldwide Summit

- A unique event of this kind in France

- A European and worldwide dimension

- Topics meeting the expectations of the market players migrating from IPv4 to IPv6

Multiple events in one location

- Academic tutorial

- Conference

- Hands-on tutorials with 100 PCs
  + 50 routers connected !

- IPv6 interoperability event

Conference

- Tuesday 14th and Wednesday 15th November

- Learn from our VIP's experience feedback how to facilitate the commercial deployment and the resolution of new operational problems

Conference

- KEYNOTE SPEAKERS include officials from the European Commission, France, Japan, Korea, Taiwan, North America, India and China

Conference

- Featuring a variety of multi-sector activities

  1. Deployment in Governmental Agencies
  2. Deployment in the Education sector and regional environment
  3. IPv6 deployment in Telcos, Cable Operators and ISPs Networks and Services
  4. IPv6 Deployment in the vertical markets

  ...

Hands-on tutorial

- Practice on essentiel topics like:
  - Network configuration: auto configuration, Client/Server setup and programing (API),
  - Network services set up
  - IPv4/IPv6 integration
  - IPv6 routing (OSPFv3, Multicast, BGP)
  - Network management

IPv6 Plugtests

- Access in one place a **wide range of tests** provided by various test companies

- Check the interoperability of products with those of international and active market players

- Improve and debug IPv6 implementations by:
  - running the available **Interoperability** and **Conformance** tests
  - running the **TTCN-3** tests.

IPv6 Plugtests

- Run the tests of the **IPv6 Ready Logo phase-1 and phase-2**.
- In partnership with:

Make the most of it !!
